The Ultimate
Conference
IT Integrator

**COMPUTER
ARCHITECHS
INTERNATIONAL
CORPORATION**

Communication is the key to the success of any conference. We specialize in integrating hardware and software solutions to create a smoothly running communication experience for conference attendees, exhibitors, and show management.

Computer Architechs designs, builds and maintains custom workstations where up-to-the-minute conference information can be accessed quickly and easily. We manage the kiosks that provide

program schedules, internal and external e-mail services, internet access, event information, exhibitor announcements, discussion forums and much more. Conference

displays are also provided as electronic signage for each session room, as overflow and repeat session alerts, and as message notification for attendees with urgent messages waiting.

Our Web site design and development service further enhances the conference experience by providing both pre-show and post-show access to the same information you have on-site.

Computer Architechs has successfully setup and managed computer-based communications systems for world-class conferences across the globe. We tailor communications systems to blend into the conference environment and meet the unique requirements that each event offers.

Contact us to learn more about how our custom IT integration can take your conference to the next level.

Computer Architechs International Corporation

Your Key to a Successful Conference

- Roaming user technology
- Up-to-the-minute conference information
- Intra-conference e-mail and attendee listings
