VIRTUAL KIOSKS

The Essential Virtual Conference Tool

Extend the value of any conference by providing attendees with access to information before and after the event using the Virtual Kiosk. Upon registering, attendees are e-mailed a user name and password to allow for secure and personal access to the Virtual Kiosk (which contains the latest information about a conference). Before the event, attendees can prepare their schedule and have the opportunity to network ahead of time. After the event, the Virtual Kiosk can download session presentation files and other post-show information.

- **Customized Interface** - Conference images and branding, along with logos from sponsors, can be designed into the Virtual Kiosk Web site interface to create a unique experience for your attendees.

- **Personalized and Secure Environment** - Any information that the attendee saves when sending e-mail, creating their own schedule, or using any other feature remains personal and secure because we assign each attendee a unique user ID, password, and a personal conference e-mail account.

- **PDA Connectivity** - PDA installable files can be made available online prior to the event so that attendees can download them well before going on site.

- **Session Presentations** - It is very cost-effective to include the presentation files used by session speakers into the Virtual Kiosk. This way attendees can download and print the files from the convenience of their home or work PC.

- **Industry-Standard Browser Support** - We make sure that users can access the Virtual Kiosk using any of the latest industry-standard browsers.

- **Attendee Networking** - The Virtual Kiosk can be used to facilitate networking by providing e-mail, an attendee directory, and a meeting scheduler. Attendees can use these tools to find other attendees and schedule meetings before arriving on site.

- **Up-to-Date Conference Information** - Conference information is always changing and being updated. The Virtual Kiosk can be used as the tool for making the latest information available 24/7.

- **Registration Coordination** - Working closely with your registration company, we obtain up-to-the-minute attendee data before and during the event. This ensures that all of your attendees can readily access the Virtual Kiosk, and allows us to update the attendee directory.

- **Session Streaming** - If sessions are being videotaped, it is possible to stream them over the Internet from the Virtual Kiosk after the event. This allows attendees to review sessions they may have already attended or to attend a session that they may have missed while on site.

- **Conference Discussions** - Attendees can engage in on-line discussion forums to stimulate feedback about the event, and to discuss conference-related topics.

Virtual Kiosks provide registered attendees with access to information about your event before and after the conference.
